

BENEFITS FOR DOCTORS

Save Time

It will only take you a few minutes to implement **bookmydoctorcall.in** in your practice, but it will save you hundreds of hours per year. Once your account is setup, your reps will book and confirm appointments online (subject to your scheduling rules - you stay 100% in control) rather than taking up valuable staff time while standing at the patient-waiting hall.

Companies Relationship

As you know, the rep world is constantly in flux because reps often get promoted, change companies, or move to new territories. **Bookmydoctorcall.in** automatically ensures that these changes do not negatively impact your relation with those companies.

Request Samples/references/other details

Now you'll have a constantly updated directory (up-to-date, user-supplied information) of all reps .So, you can find and request those needed samples/references directly to reps through **bookmydoctorcall.in**. Our **messaging** and **rep-finder tools** will also very helpful to you in this regard.

Manage Your Favorite Reps/Companies.

You have total control of which reps can book appointments with your practice and how often they can book. You can designate the reps that carry products that you need more frequently as "SPECIAL" reps, and allow them to visit more often by setting "SPECIAL" appointments. Alternatively, in worst conditions, you can **prevent** individual reps/companies that you no longer wish to see from booking any appointments.

Control Your Waiting Room

Reps will no longer stack up in your waiting room or parking lot hoping to see you. They will arrive in an orderly manner at the time they are expected, which is great for you, your staff, your patients, and the reps! It is much nicer for the rep to be welcomed in as an expected visitor than turned away as an uninvited guest.

No disturbance for your staff

Clinic staff will no longer have to spend time answering unending calls from reps regarding appointments. Because representatives can schedule these appointments away from your office, there will be less traffic at your front desk. It saves clinic staff time not dealing with the administrative aspect of booking rep appointments.
